

Lexington-Fayette Urban County Government

Migrates Full PeopleSoft Suite From OCI-C to OCI With Metaformers as Their Strategic Partner

In less than four months, Metaformers has successfully migrated Lexington-Fayette Urban County Government (LFUCG) to OCI during the COVID-19 pandemic. The migration included the full PeopleSoft financial and human resources suites—one of the largest application footprints in the Oracle cloud. This migration followed the combined team’s migration to the first-generation Oracle cloud infrastructure, Oracle Cloud Infrastructure Classic (OCI-C), in 2018.

Objectives

- Get critical departments out of the data center management trap
- Reduce the risks and costs of managing infrastructure
- Improve security
- Free up critical resources
- Future proof vital infrastructure
- Reduce risk and exposure

“The project already had a tight schedule for moving to the new OCI platform when COVID-19 hit. We moved our staff to work from home and established new processes and ways to communicate among ourselves and with our customers. It was our continuous partnership with Metaformers that was constant and critical to our success.”

—Aldona Valicenti, Commissioner/Chief Information Officer, LFUCG

ORACLE PARTNER

RESULTS

The Metaformers and LFUCG team were ready to go live in the new cloud in under four months. This migration brought additional benefits to the client, including:

Improved region availability

An improved hypervisor based on KVM

High-performance computing (HPC), artificial intelligence (AI), and machine learning (ML)

Improved performance and monitoring insight through Oracle Management Cloud (OMC)

Expanded Oracle features like compartments, availability domains, virtual cloud networking (VCN), and bare metal (BM)

PeopleSoft on OCI—a Natural Combination

PeopleSoft will be supported until at least 2031, thanks to the 10-year rolling commitment that Oracle has made. LFUCG has been a PeopleSoft-supported organization since 2006. They have continued to gain benefits with upgrades, such as the migration to OCI. Working with a solution that offers comfort, security, and continual improvements means that LFUCG can focus on its core mission: serving the constituents of the City of Lexington and Fayette County.

What We Can Do for Your Team

It's vital for us at Metaformers to ensure every organization gets what they need to help their departments run more smoothly. With our vast experience, we understand that every institution has its own unique needs, and we work with you every step of the way to make your lives a little easier.

Our approach is fast and effective. We combine our agile methodology with practical risk and change management to deliver results that help your bottom line and deliver long-term value to your business. We understand the constant pull from multiple, high-priority initiatives and how to partner on rapid, high-value projects to gain momentum toward your strategic vision. For over 20 years, Metaformers has specialized in guiding clients along the best path to help them achieve their vision and delivering the highest value on every project.

If we can help county governments that serve thousands of residents every year, there is something we can do for you and your team. Let's start that conversation and find out what that might be—reach out at:
